

# ENV 710: Lab 7

Jiahuan Li

Spring 2023

## **Problem 1**

The null hypothesis is that the mean plant growth is the same for each fertilizer level versus the alternative hypothesis that at least one of the means is different from one of the others. logged & hunted, logged only, and pristine forests all have the same mean biomass?

## **Problem 2**

interaction plot needed

treat as factor: box plot as each level

turkeyHSD only need to partly explain
